SPECIALIZING IN UNDERGROUND PARKING & STORAGE

Vasari Lifts continues the legacy of success started by Autoquip, the leading manufacturer of material lifting equipment. We provide the highest quality and safety standards in our custom-designed parking lifts.

We aim to make your vision a reality, no matter how complex. As the leader in luxury lifting solutions, it's our mission to meet your exact specifications and enhance your property's overall value.

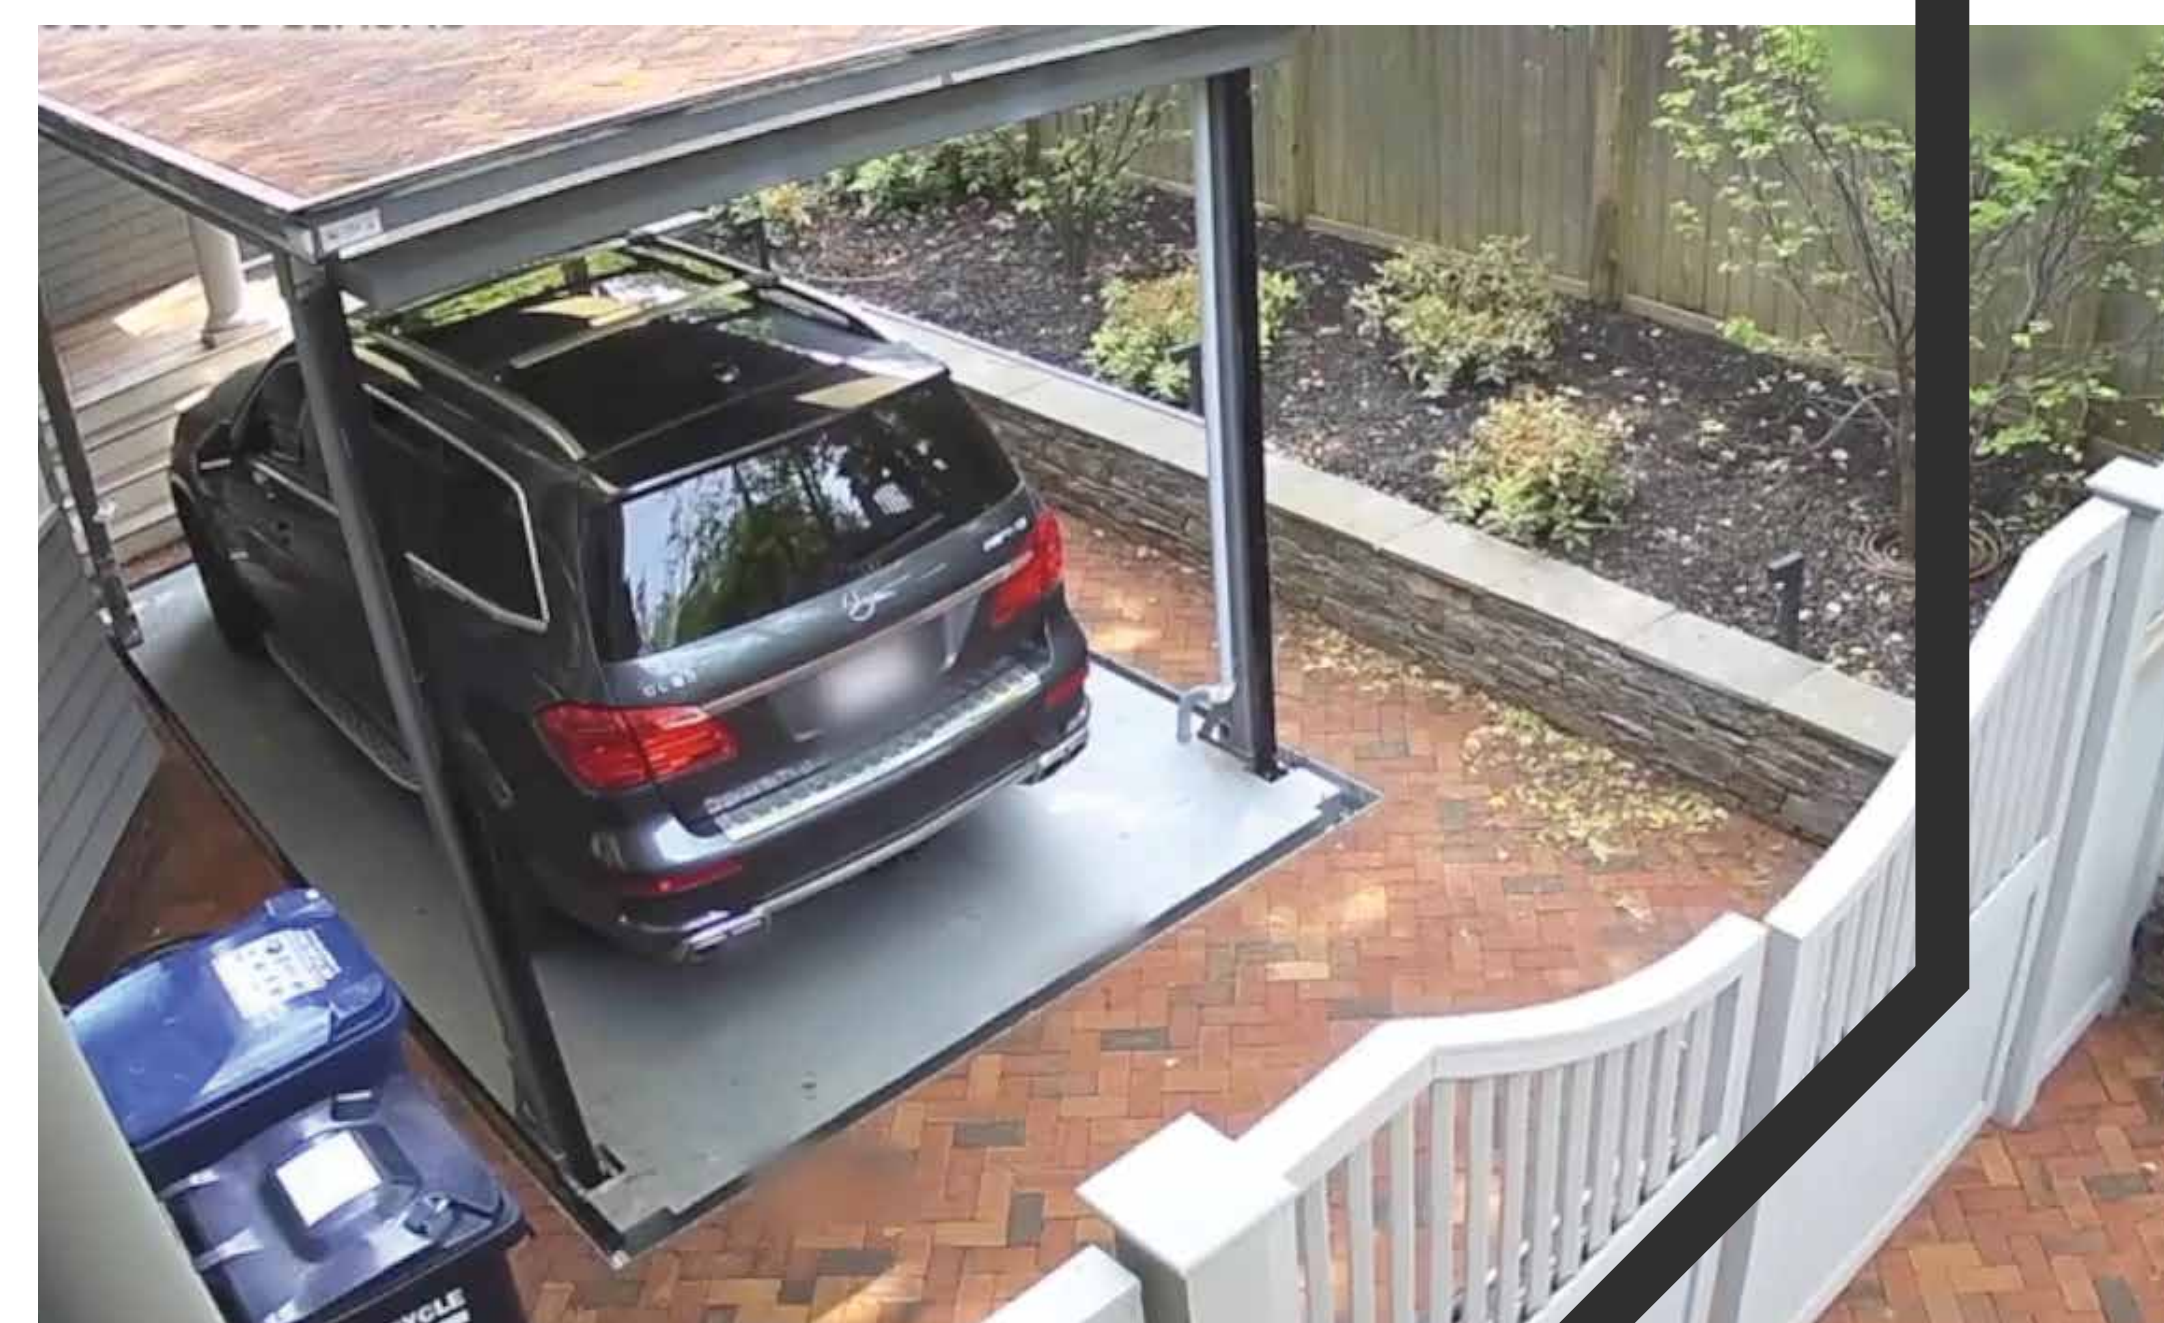

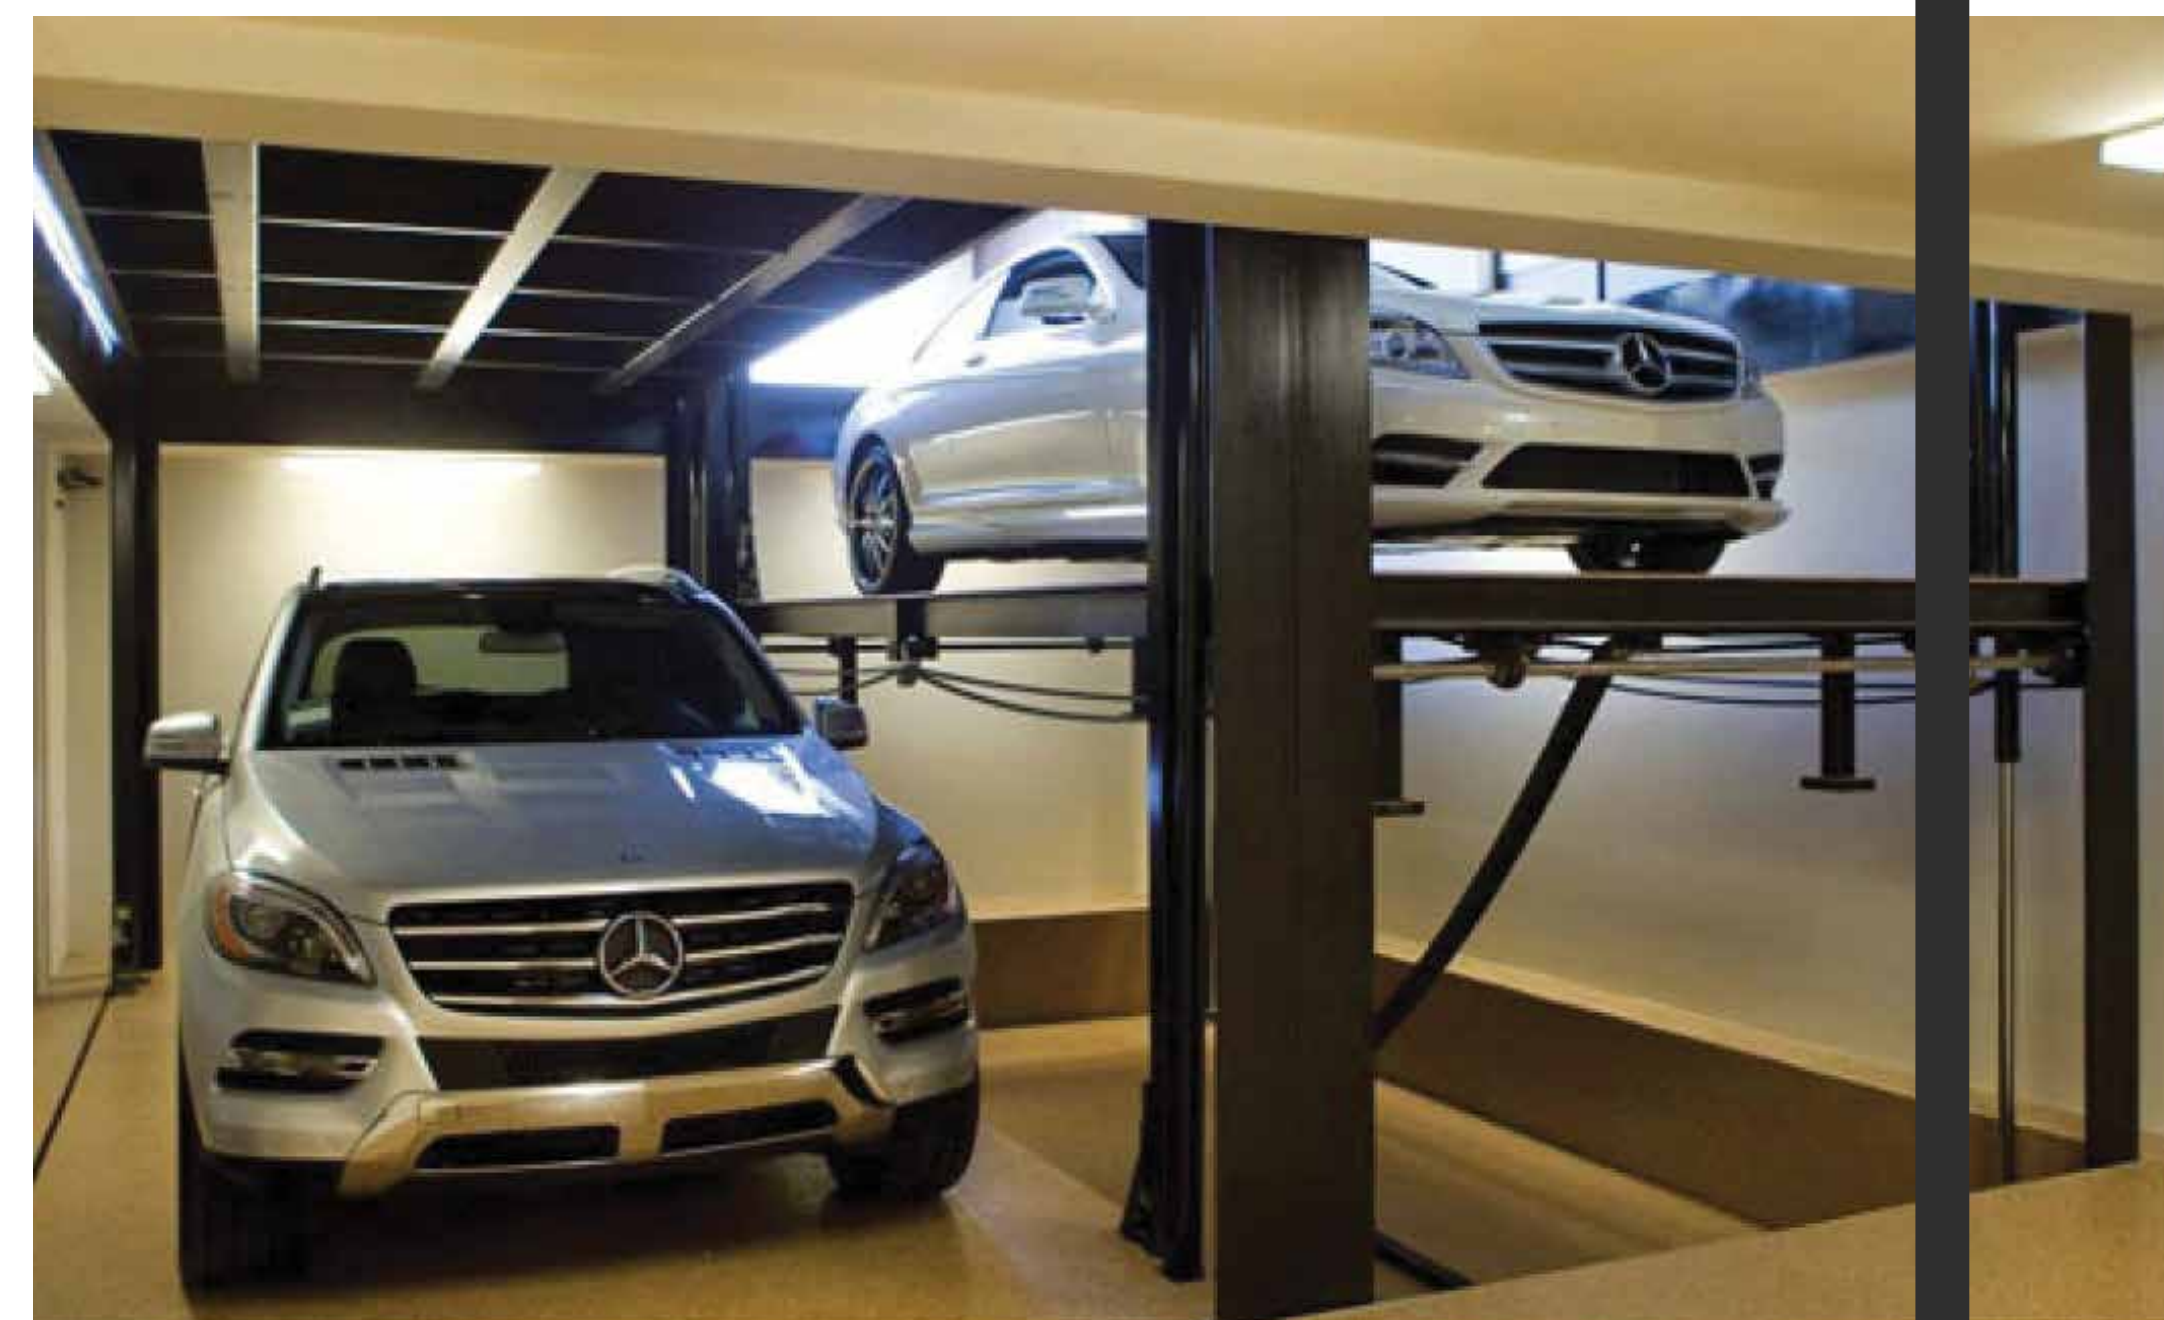

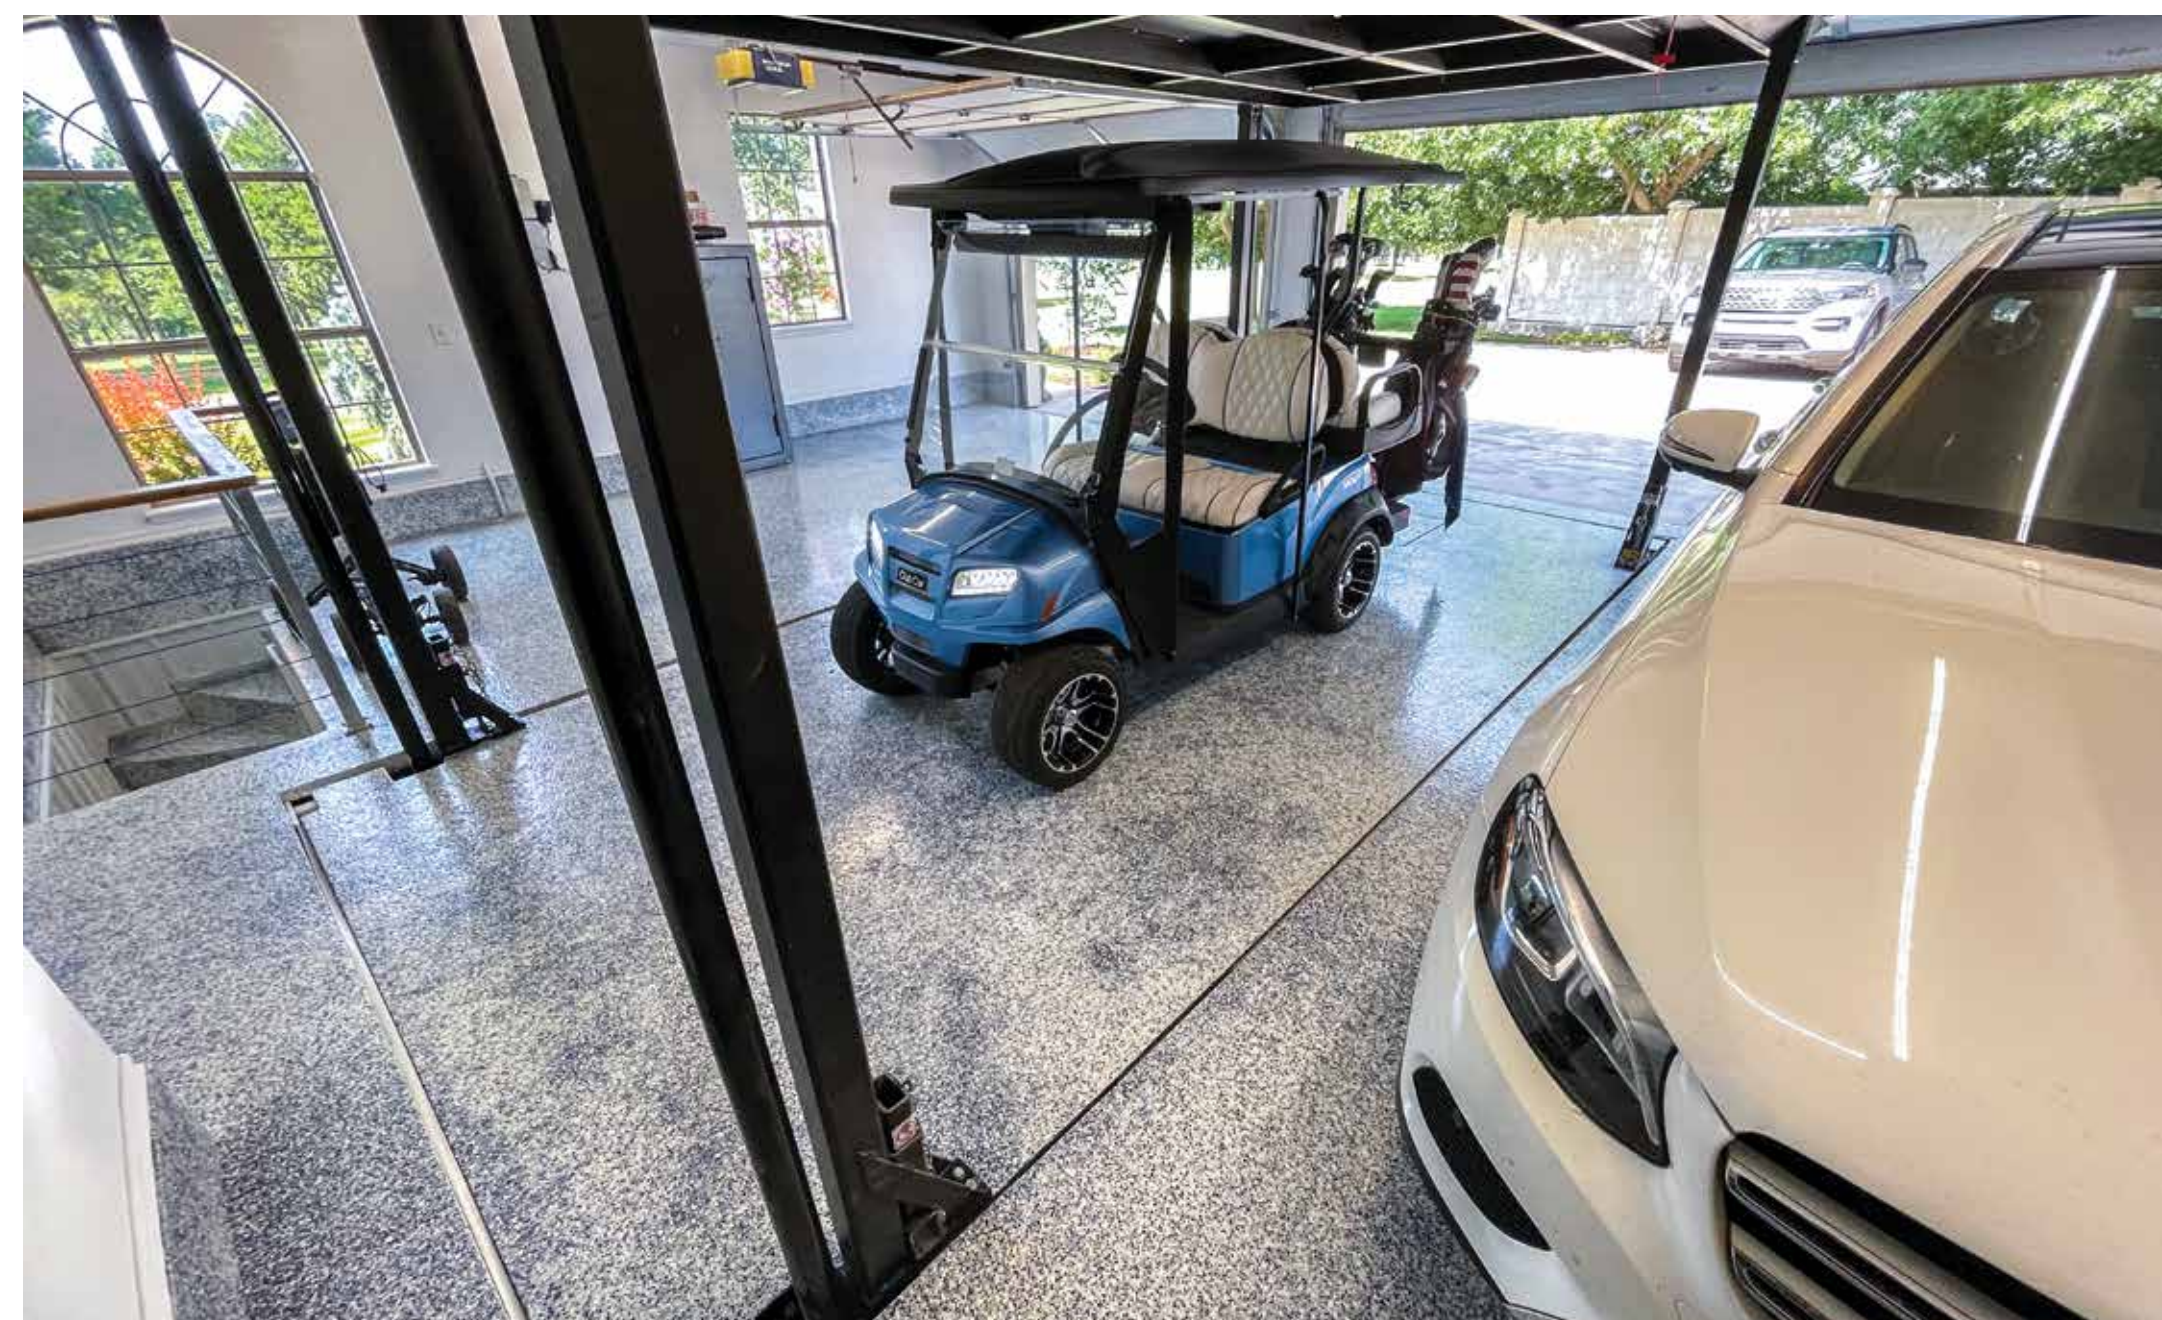

Whether you're looking to optimize space in a single-car garage or elevate a multi-car collector's showroom, there are no limits to our designs.

VASARI INNOVATION

As the leader in luxury parking lifts, Vasari is known for excellence.

Each of our underground lifts can be customized to meet your exact specifications and enhance property value.

STANDARD 4-POST SUBTERRANEAN PARKING LIFT

Lower-level access is not required, which is considered a "vault" application. For more information on application guidelines, performance, design, fabrication, installation, and test requirements visit our website or contact our sales department.

WHERE PRESTIGE MEETS FUNCTIONALITY

OUR PREMIER LIFT

Our 4-Post Design uses a "hyrdo-mechanical" equalization system, designed to combine the power of direct-acting hydraulic cylinders with the repeatable performance of a mechanical equalization system.

CREATE MORE SPACE

The Vasaril lift remains out of sight until needed, leaving a clear area above the canopy and around the upper-level floor opening for additional vehicles to park.

DOUBLE DECK CONSTRUCTION

The standard Vasari lift has double-deck construction, with each deck supporting the weight of a 7,000-pound SUV.

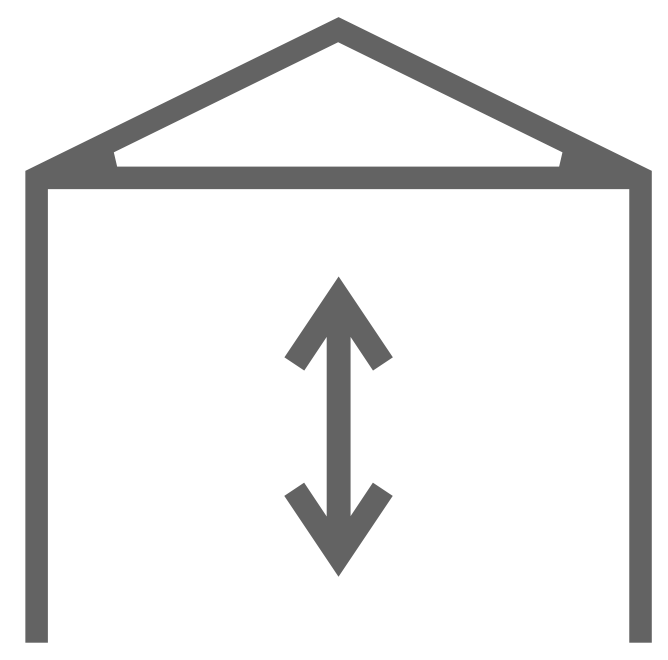

ENHANCED SECURITY

Designed to lower vehicles underground into a protected area, which affords the homeowner a high-security environment with complete control. Monitoring options are available.

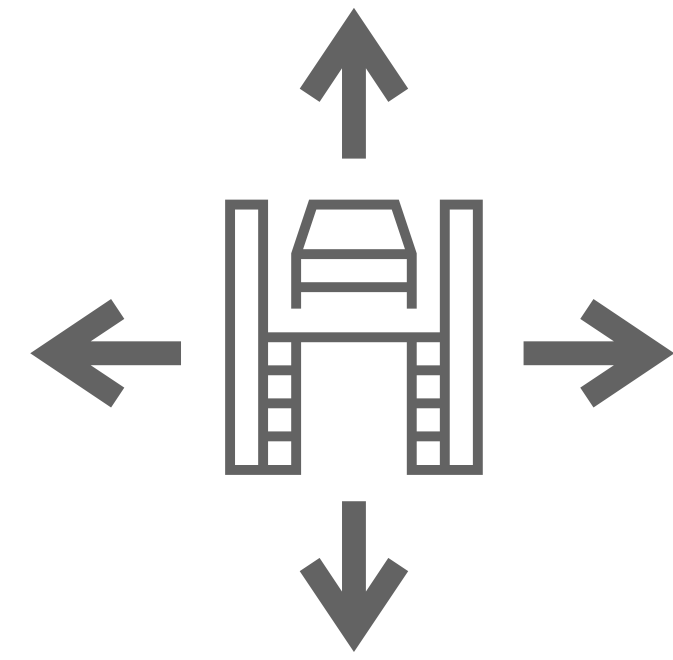

WHY CHOOSE VASARI?

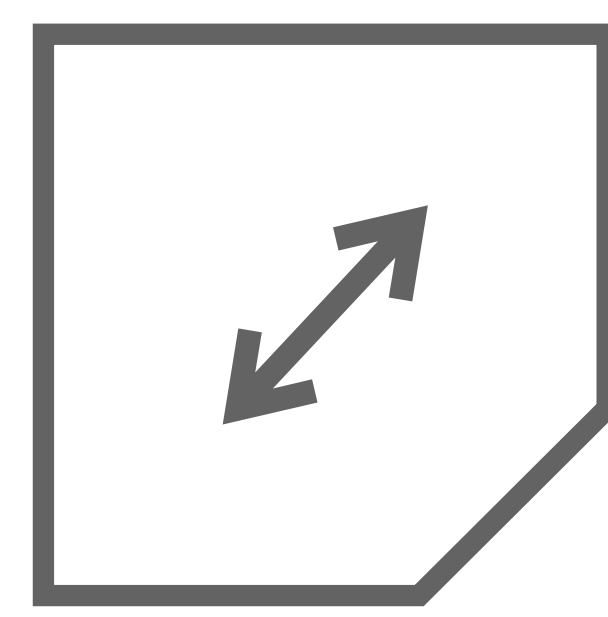

We custom-design parking lift systems of the highest quality and safety standards. Backed by 75 years of lifting experience, our car and storage lifts are built by the leaders in lifting technology. Our team consults with the architects and construction professionals to deliver high-end parking solutions for your project's specific requirements.
